

Introducing the Next Generation of

PHOTON COUNTING DETECTOR DIGITAL RADIOGRAPHY

with 18% increase in scannable area
Now Integrated Across all **Lodox Systems**

Enhanced Imaging
Precision with certainty

Optimised Low Dose
Efficiency by design

13 Seconds. One Full Body.

Total Clarity.

Forensic Full-Body Imaging Solution

eXero-dr by Lodox Systems

✓ Rapid Full-Body Imaging

Forensic Value:

- ▶ Lodox eXero-dr is a rapid, low-dose, full-body digital radiography system designed to support high-throughput forensic and medico-legal workflows.
- ▶ **Source:** Reduced backlog, faster triage before autopsy

✓ Documented Utility in South African Medico-Legal Mortuaries

Forensic Value:

- ▶ Proven relevance in South African medico-legal practice.
- ▶ **Source:** Wits University forensic review (SA Mortuary context)

✓ Significant Workflow Efficiency Gains

Forensic Value:

- ▶ Increased throughput in resource-constrained mortuaries.
- ▶ **Source:** Lodox eXero-dr forensic pathology efficiency summary

✓ Cost, Labour, and Autopsy Support Benefits

Forensic Value:

- ▶ Support autopsy decision-making and reduce unnecessary dissection.
- ▶ **Source:** Lodox eXero-dr - invaluable radiographic solution in the forensic setting

✓ Forensic Identification Applications

Forensic Value:

- ▶ Critical in mass fatality incidents and complex identifications.
- ▶ **Source:** South African Journal of Dentistry forensic identification study

Forensic Applications:

✓ VICTIM IDENTIFICATION

- Skeletal Case Support
- Prothesis

✓ SCREENING

- Medical device
- Natural pathologies
- Hazardous objects

✓ CAUSE OF DEATH INVESTIGATIONS

- Ballistics injuries
- Poly-trauma i.e., MVA, PVA, Child abuse
- SUDI (Sudden unexpected death of an infant)
- Burns
- Decomposed bodies

13 Seconds. One Full Body. Total Clarity.
